

Company Profile

Who we are

Create a contemporary lighting scheme that's both modern and energy efficient with Eleti LED Light program. With the help of effective LED technology, our expertise and a guaranteed long lifespan, you will save a fortune when it comes to replacement costs as well as your overall electricity bill. We produce LED light and we are unique global manufacturer and distributor of LED light in the world. Our business model is based and oriented towards requirements and needs of our clients. Every item in our wide range of products is customizable in terms of both aesthetic and technical features. Comprehensive luminaire characteristics such as temperature of light, power consumption, luminous flux, material or smart luminaire control - are just some of the elements that our clients can choose in order to achieve unique composition of the desired product.

LED technology is revolutionarily changing the lighting industry. With our own dedicated research laboratory we are able to drive the transformation in LED technology and develop new production methods.

Our engineers with extensive experience in lighting design, electronics, heat management and manufacturing process collaborate on the development of LED lamps, luminaires and control gears. We are completely unique as a French based lighting company in complete control of the supply chain from design, specification, manufacture, import and distribution. By specifying all of our own components, it gives us fantastic quality and flexibility ahead of the competition. At Eleti, we aim to anticipate the future needs of our customers. As well as remaining at the forefront of LED innovation, that means offering the very highest standards of service to all customers. We're known for our friendliness and the fact that we aim to give our customers a personal, engaging service. Due to growing success, Eleti Light partnered with The Greenovations Lighting & Electricals L.L.C to better serve customers in U.A.E and other GCC countries.

ELETI
LIGHT

We are global

We have successfully supplied lighting to over 1,000 projects, including IRIS Data Centre, Mara Lounge & Restaurant, SORBONNE UNIVERSITY, etc.

We have key partners in over 10 global territories supported from our offices near Saint Fargeau Ponthierry in France. Through collaborative marketing campaigns and market-specific product design, we support our partners worldwide.

Approximately 50% of our turnover is accounted for through export, with the rest from UAE sales.

Customer Support

Time zones mean nothing at Eleti with our partners having 24hr a day access to quotations, product support and order status updates.

Eleti products are assembled at our production facility in France and we offer a five year extended warranty on selected products.

We take pride in our aftersales support, maintaining exceptional relationships with key specifiers and contractors.

We are accredited

ISO 9001 accredited since 2010, our workflow is highly structured and professional. With continuous training we can ensure our team is always ready to support customers.

Our state-of-the-art production facilities are regularly inspected including quarterly checks by the Underwriters Laboratory. We have a highly skilled production team working in an ESD protected, temperature controlled environment.

In-house testing equipment enables us to conduct Ingress Protection (IP) testing and full TM-30 photometric measurements.

Certification

We work with independent test houses such as CE, ISO, Intertek and Met Labs to have our products tested and verified to worldwide region-specific standards.

ELETI
LIGHT

Our technology

Although many industries are making great strides when it comes to new technology and trends, the LED industry is certainly amongst the leaders. Over the last decade, the LED industry has experienced tremendous growth and change, with new applications, increasing efficiencies and lower costs throughout. For multiple businesses and products, this creates great opportunity. We use the advanced LED Technology to improve our product quality and output.

Warm white performance

With a long history of lighting luxury residential developments and hotels, we know how to tune our LED technology to provide the right light for living spaces.

All our products can be specificized in correlated color temperature (CCT) from 2000K 'candlelight warm white' to 4500K 'daylight horizon white' while maintaining high lumen output and efficacy.
